

Tire Black Wax

02015
EN

A unique product for nourishing and protecting tyres and unpainted plastics in form of a hard wax. The carbon black pigment formula effectively restores colour intensity, provides hydrophobic properties and protects faded tyres and plastics from dirt. It offers a matte finish, without shine or slipperiness.

Directions: 1. Prepare the tyre/plastic surface by cleaning it with a recommended cleaner – e.g. Stain Cleaner, and then dry it. 2. Open the can by lifting the metal lid with the yellow part. 3. Pick up out a small amount of product using the included applicator. 4. Apply evenly to the surface until a uniform effect is achieved. 5. After 1 minute, wipe the surface with a microfibre to remove excess product. ! Apply carefully. In case of application on neighbouring parts, remove marks immediately with a microfibre and Silicone Off or similar cleaning product.

Contains: hydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%).

Flammable solid. Causes skin irritation. May cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Wear protective gloves/protective clothing. IF ON SKIN: Wash with plenty of water and soap. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Dispose of contents/container to properly labelled waste containers according to national law.
