

Nano Hard Clear

03144
EN

Professional protective coating for components made of transparent plastic. It effectively protects headlights, lamp housings, turn indicators, or windscreen fairings. It provides excellent transparency, protects against degradation, and reduces dirt adhesion. Thanks to its hydrophobic properties, it increases the effectiveness of headlights in rainy conditions.

Directions: 1. Prepare the surface by cleaning and degreasing it with dedicated products – e.g. Silicone Off. 2. Shake the bottle and apply the agent to the white side of the supplied applicator. 3. Spread evenly on the surface. 4. After -1 minute, wipe the surface with the unused white part of the sponge (the other side of the applicator). 5. Leave the surface to cure for 24 hours. Do not allow contact with water or chemicals during this time. ! Full curing of the coating takes place -4 days after application.

Contains: propan-2-ol; methanol; 3-trimethoxysilylpropane-1-thiol.

Highly flammable liquid and vapour. Toxic if swallowed. Toxic in contact with skin. May cause an allergic skin reaction. Causes serious eye irritation. Toxic if inhaled. May cause drowsiness or dizziness. Causes damage to organs (optic nerve, central nervous system) (ingestion). Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Wear protective gloves/protective clothing/eye protection/face protection. **IF SWALLOWED:** Immediately call a POISON CENTER/doctor. **IF ON SKIN:** Wash with plenty of water and soap. **IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Dispose of contents/container to properly labelled waste containers according to national law.
