

Glaco Roll On Large

04107
EN

Glaco Roll On Large is a glass coating with effective water repellency at speeds as low as 45 km/h, making it unbeatable in urban driving! The coating significantly improves driving comfort and safety in difficult weather conditions. You will also appreciate its effect in summer, when it will help you remove bug splatter from headlights, and in winter, when it will reduce the build up of frost on your windows. Thanks to its ergonomic bottle and integrated applicator, Glaco Roll On Large is amazingly easy to use.

Directions: 1. Wash the vehicle thoroughly and prepare the windows with a dedicated product – Glaco Compound Roll On or Compound Z, then rinse and dry the windows. 2. Take the cap off and apply the applicator onto a dry windshield. Apply pressure to the bottle to let the fluid out and rub it firmly onto the windshield. 3. After application, let the coating sit on the glass' surface for 5-10 minutes. After that time, wipe off all remaining liquids with a slightly damp towel or microfiber for best results. 4. Finish the process by polishing the glass' surface with a dry, clean towel or microfiber. ! Make sure not to apply the coating onto a wet glass surface, otherwise it may cause streaks and scratches.

Contains: propan-2-ol.

Highly flammable liquid and vapour. Causes serious eye irritation. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapours/spray. Wear protective gloves/eye protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container to properly labelled waste containers according to national law.
