

# Glaco Deicer Spray

04165  
EN

Glaco De Icer is super-effective glass defroster created for every car owner and especially for those using Glaco technology. It instantly dissolves frost, snow and ice even at  $-40^{\circ}\text{C}$ . The formula, enriched with a hydrophobic additive, boosts previously applied Glaco coatings and reinforces their effect. On unprotected windows, De Icer makes them repel water at speeds as low as 60 km/h.

Directions: 1. Shake the bottle well and turn the nozzle to the position with the spray symbol. You can choose a mist spray or precise application mode. 2. Spray it keeping it 15-20 cm away from the glass' surface. 3. Turn on the wipers once frost and ice start to melt or polish the surface with a microfiber. **!** If there's any loose snow, ice or frost on the glass' surface, remove it before application.

Highly flammable liquid and vapour. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Wear protective gloves/eye protection. **IF ON SKIN** (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Store in a well-ventilated place. Keep container tightly closed. Dispose of contents/container to properly labelled waste containers according to national law.
