

Glaco Q

04168
EN

Glaco Q is a 2-in-1 glass coating that decontaminates the glass and protects it with a strong hydrophobic film that allows water drops to be repelled from the windscreen at speeds as low as 45 km/h. Glaco Q limits the accumulation of dirt, making car maintenance much easier, and in winter it reduces frost build-up. Special shape of the applicator allows for precise application, even in the corners of the windscreen.

Directions: 1. Prepare the vehicle by washing it with a pH-neutral shampoo. 2. Take the plastic cover off and apply the Glaco Q on a dry windshield. Apply pressure to the bottle to let the fluid out and rub it firmly on the windshield. 3. After application, let the compound sit on the glass' surface for 5-10 minutes, then wipe it off with a slightly damp towel or microfiber. 4. Finish the process by polishing the glass' surface with a dry, clean towel or microfiber. ! Make sure not to apply the coating onto a wet glass surface, otherwise it may cause streaks and scratches.

Contains: propan-2-ol.

Highly flammable liquid and vapour. Causes serious eye irritation. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapours/spray. Wear protective gloves/eye protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container to properly labelled waste containers according to national law.

Components according to Regulation on detergents 648/2004/EC as amended: aliphatic hydrocarbons < 5%.
