

Glaco W Jet Strong

04169
EN

W-Jet is the fastest hydrophobic glass coating in the world! Spray it onto a wet windscreen, turn on windscreen wipers and you're done! A specially designed double nozzle spray allows for quick and precise application even on large windscreens. As a result, water will be effectively repelled off the glass in just a few seconds even at a speed as low as 60 km/h. W-Jet can also be used as a quick boost for previously applied coatings from the Glaco family.

Directions: 1. If applied on dry glass: wash the car thoroughly and prepare the windows with a dedicated product – Glaco Compound Roll On or Compound Z, then rinse and dry the windows. 2. Spray onto the windshield for about 3 seconds, making a Z-shaped motion. 3. Wipe off with a slightly damp towel or microfiber, spreading the agent on the windshield. Continue until the windshield is perfectly clear. ! If applied on wet glass: spray onto the windshield for about 3 seconds, then turn on the wipers.

Contains: propan-2-ol.

Extremely flammable aerosol. Pressurised container: May burst if heated. Causes serious eye irritation. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Use only outdoors or in a well-ventilated area. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Protect from sunlight. Do not expose to temperatures exceeding 50°C /122°F. Dispose of contents/container to properly labelled waste containers according to national law.
