

# Glaco Roll On Instant Dry

04951  
EN

A hydrophobic coating that bonds to glass surfaces in just a few seconds. Simply spread the product on the glass and immediately polish the residue to enjoy the Glaco water repellent effect. The coating powerfully repels water from the glass, so that visibility and driving comfort in rainy conditions are improved at speeds as low as 45 km/h, and the need to use wipers is reduced to a minimum. In addition, the product makes it easier to keep your car windows clean and, in winter, reduces the build-up of frost and ice.

Directions for use: 1. Hand wash the glass, then clean it with Glaco Compound Roll On or Glass Compound Z. 2. Spread the product on the surface of the dry glass. Work on areas no larger than 50 cm x 50 cm. 3. Remove the residue immediately with a dry and clean microfibre cloth, don't wait for the product to dry. 4. Gradually cover the entire window by repeating steps 2 and 3. (!) Make sure the glass does not come into contact with water for 10 minutes after application.

Contains: propan-2-ol.

Highly flammable liquid and vapour. Causes serious eye irritation. May cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapours/spray. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container to properly labelled waste containers according to national law.
