

GLACO DX

04957
EN

Glaco DX is a powerful water-repellent glass coating. Thanks to the latest SARF technology, it's easy to apply and forms a smooth film on the surface of the car's window, instantly repelling water, improving visibility and driving comfort in the rain. Additionally, it repels road dirt and in winter, limits accumulation of frost and ice. The effect lasts up to 4 months. The innovative, movable, rectangle-shaped applicator head makes the work easier and allows you to comfortably reach the corners of a car's window.

Directions: 1. Before use, wash the car thoroughly and clean the windows with a dedicated product – Glaco Glass Compound Roll On or Glass Compound Z. 2. Remove the applicator cap, place the product on the glass and lightly squeeze the bottle to soak up the felt part of the applicator. 3. Apply the product evenly in a criss-cross motion, pressing the applicator gently against the surface of the dry glass. 4. Allow the product to dry for approximately 5-10 minutes and then wipe off any remaining residue with a slightly damp microfiber. 5. Use a dry and clean microfiber to remove all remaining residue until the glass is perfectly clear. ! After application, make sure the glass is perfectly clear and free from any residue. Incomplete removal may result in wiper judder.

Contains: propan-2-ol; propan-1-ol.

Highly flammable liquid and vapour. Causes serious eye damage. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapours/spray.
