

# Glaco Glass Compound Roll On

10308  
EN

Glaco Compound Roll On is the easiest way to safely remove even the most persistent dirt from glass surfaces. The felt applicator combined with the product's abrasive formula allows you to get rid of road film, oily dirt, scale and old protective coatings. Thanks to the specially shaped handle, the application of the product is quick and easy. The wide head of the applicator will help you quickly clean even the largest windcreens in no time.

Directions: 1. Prepare the glass surface by washing it thoroughly with a pH-neutral shampoo. 2. Shake the bottle well. 3. Optionally, lightly dampen the surface of the glass to facilitate the work. 4. Apply the product to the grey side of the sponge applicator and move it on glass until the surface no longer repels the product. 5. Rinse the compound thoroughly. Use high-pressure water if needed. ! Do not allow the product to dry completely, especially on adjacent painted parts.

The product is not classified as hazardous for human health and life and for the environment.

Components according to Regulation on detergents 648/2004/EC as amended: anionic surfactants < 5% preservation agents (OCTYLISOTHIAZOLINONE, METHYLCHLOROISOTHIAZOLINONE, METHYLISOTHIAZOLINONE, IODOPROPYNYL BUTYLCARBAMATE).
