

# Glaco Mirror Coat Zero

10309  
EN

Glaco Mirror Coat Zero is an ultra-hydrophobic coating for mirrors and on-board cameras that will shock you with the sheer power of its water repellency! Perfectly clean, water and dirt-free mirrors and reversing cameras mean greater safety and comfort during everyday driving and parking, especially at night.

Directions: 1. Wash the mirrors with a pH-neutral shampoo before application. If special hydrophobic coatings have been applied to the mirrors before, remove them with a dedicated cleaner. 2. Slide the cardboard from the packaging between the mirror and the mirror housing to protect the adjacent parts from stains. 3. Shake the bottle well before use and spray the mirror from a distance of about 15-20 cm. 4. Allow the product to dry (-1 hour in summer, -2 hours in winter). ! If applied on heated mirrors we recommend not to use heating; do not apply on mirrors with other coatings. The coating is sensitive to mechanical forces such as touch or strong jets of water. We recommend applying the coating every time you wash the car."

Contains: propan-2-ol.

Extremely flammable aerosol. Pressurised container: May burst if heated. Causes serious eye irritation. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Use only outdoors or in a well-ventilated area. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Protect from sunlight. Do not expose to temperatures exceeding 50°C. Dispose of contents/container to properly labelled waste containers according to national law.
