

# Ultra Glaco

10310  
EN

Ultra Glaco is a legendary glass coating and one of the most popular products of its kind in the world. Thanks to the Fusso technology of fluoropolymers being used here, it is unsurpassed in terms of durability of up to 12 months and resistance to harsh weather conditions. When driving in the rain, it repels water at speeds as low as 45-60 km/h, and all year round it reduces dirt adhesion and makes regular maintenance easier – in spring and summer it allows bug splatter to be easily removed from the windscreen, and in winter it reduces the build up of frost and ice.

Directions: 1. Wash the vehicle thoroughly and prepare the windows with a dedicated product – Glaco Compound Roll On or Compound Z. 2. Apply the product on the dry windshield evenly, in criss-cross pattern. 3. Wait until white residue appears on the glass. 4. Polish the residue with a clean and dry microfiber cloth. ! Make sure the glass surface is dry before application. For best durability protect glass from contact with moisture for approx. 12h after application.

Contains: propan-2-ol.

Highly flammable liquid and vapour. Causes serious eye irritation. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing vapours/spray. Wear protective gloves/protective clothing/eye protection/face protection. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container to properly labelled waste containers according to national law.
