

Fusso Coat 12 Months Wax -Light Color

10331
EN

Legendary wax coating that creates an **ultra-durable protective layer** on the paintwork. Thanks to special fluoropolymers, it guarantees up to 12 months of paint protection. Fusso Coat reduces dirt adhesion, is resistant to salt, acid rain and UV rays. It also provides an incredible shine and spectacular hydrophobicity. It helps keeping the car clean and makes regular car maintenance easier. Suitable for lighter paintworks.

Directions: 1. Prepare the vehicle by washing it with a pH-neutral shampoo, drying it; cleaning its surface using a clay bar, cleaner or other product of this kind. 2. Apply the wax to a slightly damp supplied sponge by lightly rubbing it on the wax's surface. 3. Spread a thin and even layer of wax on the paintwork in a criss-cross pattern, working panel by panel. 4. Wait about 5-8 minutes until the wax binds with the paintwork. The higher the temperature, the shorter time is needed. 5. Polish the residue with a clean and dry microfiber cloth, frequently changing the sides of the microfiber or replacing it with a new one. ! To make product application easier, dampen the applicator slightly before using the wax. ! Never apply wax in direct sunlight or on hot components. ! After each wash, boost the coating's effect with dedicated Soft99 Fusso Coat Speed & Barrier quick detailer.

Flammable solid. Toxic to aquatic life with long lasting effects. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Dispose of contents/container to properly labelled waste containers according to national law. Repeat exposure may cause skin dryness or cracking.
