

# **QJUTSU Clay Bar**

**10508  
EN**

**Detailing clay bar for mechanical decontamination of paintwork. It removes stubborn dirt, preparing the surface for wax or coating. Can be used also on rims, glass and chrome parts.**

**Directions: 1. Make sure that the paintwork is clean. 2. Knead a small piece of clay in your hands until it's soft. 3. Give the clay a good glide on the paintwork by repeatedly applying mixture of water and small amount of shampoo. 4. Rub the clay across the paint in horizontal movements until you don't feel friction. 5. Fold it when dirt becomes visible. Never resume work with a piece of clay that has fallen to the ground!**
