

Rain Drop

10526
EN

Rain Drop is an instant protective agent for almost all surfaces of a car - paintwork, glass, plastic and chrome. Applied directly after cleaning on a wet surface, works great as a self-protection or reinforcement of previously applied coatings. Provides strong hydrophobic effect, gloss and protection. The high-pressure atomizer allows quick and comfortable application, even on large surfaces.

Directions: 1. Wash your car with a neutral pH shampoo to remove all dirt. 2. Pressure rinse the car. 3. By pressing the atomizer trigger* apply optimal amount of product onto wet surface of the car car, and then immediately spread the foam with soft and absorbent microfiber. Remember to change microfiber sides frequently. 4. Buff each element with a dry microfiber to make sure that all product remains have been removed. * If you want the atomizer to spray the product constantly, set the side trigger to horizontal position.

Extremely flammable aerosol. Pressurised container: May burst if heated. Causes serious eye irritation. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Protect from sunlight. Do no expose to temperatures exceeding 50°C. Dispose of contents/container to properly labelled waste containers according to national law.
